- Portaria Nº. 399/2015, of November 5th - [Preparatory Elements for LUA Procedures](#)
- Decree-Law Nº. 12/2020 of April 6th - European trading system of greenhouse gas emissions
- Decree-Law Nº. 102-D/2020, of December 10th– General System of Waste Management

Installation and Operation Title Request

Preparatory elements

- Electronic form (available at <https://sir.iapmei.pt/areservada>)
- Descriptive Memory
- Designed parts
- Project of electric or thermal energy production or evidence of prior approval
- Evidence of prior favorable information about urban operation or architectural design approval issued by City Hall, or declaration of option by the deferral of its delivery
- Request for authorization of installation or operation of pressure equipment request, when applicable

- Greenhouse gas emissions title request , if applicable
- Waste management operations licensing request, when applicable
- Information on the implementation of the environmental legal systems covered.

(see Chapter II e III (section II) of Portaria nº 399/2015, 5 November)

3

How to submit the request

1. Through the online channel:

<https://sir.iapmei.pt/areservada>

- Filling the "Framework form" – free Access, without requiring authentication, where it is requested a set of answers that will allow, at the end, to classify the industrial facility, identify the applicable procedure, the Coordinator Entity (CE), the environmental regimes applicable and, when available, the rate value.

At the end of the filling, and if you intend to proceed with the application submission, the transition to the detailed form requires an authentication that will allow access to your confidential area, where it will be kept until their submission request (which will only be allowed after the complete filling out the form and attach the required documents).

* Citizen card, digital certificate of lawyer or solicitor or mobile digital key

- Filling the "Detailed form" - Organized by sections aimed the characterization of the EI and generated based on the framework form. Like in the framework form, the given answers determine the questions raised in the course of filling out the application.

The last section (P-attachments), is suitable to attach all necessary documents to the statement of claim. This section is presented by items according to the supporting elements contained in the Portaria referred above.

Required fees

- Determined by Portaria Nº. 280/2015, of September 15th and Portaria Nº. 332- B/2015, October 5th (fees related to the environmental regimes)

Deadline for decision about the request for installation

- Check page 22 from “Guidance on Industrial Licensing ” available at IAPMEI’s website through the link:

https://www.iapmei.pt/PRODUTOS-E-SERVICOS/Industria-e-Sustentabilidade/Licenciamento-Industrial/Documentos-LI/GuiaLicenciamento_112017.aspx

Enabling document for the exercise of the activity

- Installation and Operation Title

Beginning of the Operation

The exploitation of the establishment can start as soon as the following elements are issued:

- Operation and installation title
- Authorization to use title (permit of use license)
- Non-contractual liability insurance contract (see article 4 of SIR).

The date of the beginning of the exploitation should be communicated to the Coordinator Entity, at least 5 days before (art. 32 of SIR).
